Communities In Schools of Michigan
Volunteer Application

Our trained Site Coordinators work inside K-12 schools by building one-on-one relationships with students. We identify students’ unique needs and partner with the community, volunteers, and teachers to address them. From providing clean clothing to career/college counseling, or emotional support, we connect students with the needed resources to remove barriers for vulnerable students at risk of dropping out, keeping kids in schools and on the path to graduation. Our Mission is to surround students with a community of support, empowering them to stay in school and achieve in life. Are you ready and willing to help?

Name __________________________________________ Email/Phone __________________________________________
